YOUR MENTAL HEALTH. OUR PRIORITY

MODULE -1

CHILD Psychology

Child psychology is a broad area, covering how people change as they grow up from birth through to adolescence and trying to explain how these important changes occur. Child psychology is a concept aimed at the all-round development of the child.

Child psychology is a branch of psychology. Under which the behavior of children and their inner minds are observed. Child psychology is also known as “Developmental Psychology” in the modern era.

IMPORTANCE OF CHILD PSYCHOLOGY

HIGHLIGHT

- Understanding the normal and abnormal psychological patterns of a child can help parents understand how to best communicate & connect with their child, teach their child coping mechanisms for managing emotions, & help their child progress and thrive in each new developmental stage.
- Child psychologists can also identify abnormal behaviors early, help detect the root of common behavioral issues such as learning issues, hyperactivity, or anxiety, and help children work through early childhood trauma. They can also help to prevent, evaluate, and diagnose developmental delays or abnormalities such as autism.

- One of the the most important benefit of child psychology is the improvement of the Self -Esteem of a child!
- Child psychology provides the framework and support for a child to develop a healthy respect and regard for self and for others!
- Child psychology plays an important role in helping teachers to create Socio-emotional climate that is conducive in the classroom, so that the process of learning in the classroom can be productive.

Child Psychology Helps Parents & Teachers Better Understand kids & how best to support them.

CHILD PSYCHOLOGY IS A SPECIALISED BRANCH OF DEVELOPMENTAL PSYCHOLOGY

A child psychologist is an expert in childhood development who works with children and adolescence to diagnose and help resolve issues that cause emotional or behavioural problems. Child psychology is important because it can help us better understand how kids tick as well as how best to support them to become well rounded individuals. It is therefore useful in assisting both parents and teachers to better understand & help children in their care.

“
*There is in every child
at every stage a new
miracle of vigorous
unfolding.*

~ Erik Erikson

”
